Coimbatore

Passionate Front End Developer and aspiring Full Stack Engineer with expertise in crafting intuitive, responsive web interfaces and seamless end-to-end solutions. Skilled in modern front-end frameworks like Angular and React, with intermediate backend proficiency in Node.js and Spring Boot.

TECHNICAL SKILLS

Angular React HTML CSS JavaScript TypeScript

Java Spring Boot PostgreSQL MongoDB Git

GitLab Docker Azure

WORK EXPERIENCE

COMMVAULT (MERGED APPRANIX)

Front End Developer | Apr 2024 - Present

- Enhanced and maintained the product after acquisition, implementing features aligned with the acquiring company's requirements.

APPRANIX

Front End Developer | Sep 2023 - Apr 2024

- Developed customer-focused features and enhancements using Angular, improving user experience and optimizing performance and efficiency.
- Collaborated with cross-functional teams to improve interfaces, mentored junior developers on technologies and workflows, and adhered to Agile practices throughout the product lifecycle.

On Job Training | Apr 2023 - Sep 2023

- Worked closely with senior developers to deepen my understanding of front-end development best practices and improve coding standards
- Worked on key features of the product as part of training, gaining hands-on experience and enhancing functionality.

Software Engineer Internship | Aug 2022 - Apr 2023

- Built a strong foundation in JavaScript, TypeScript, SCSS, Angular, and Angular Material through hands-on projects and training.

EDUCATION

E.G.S Pillay Engineering

2019-2023

B.E ECE

CGPA: 8.85

National Higher secondary school

HSLC - 2019

SSLC- 2017

77%

91.4%

SOFT SKILLS

Communication

PROJECTS

AWS Recovery Profile

- Implemented the CRUD functionality for this feature on the front-end, ensuring smooth user interactions and efficient data handling.
- This feature enables customers to greatly minimize the time spent on selecting recovery configurations during a disaster recovery event.

Configuration Drift

- Built a front-end interface for Config Drift, allowing users to easily visualize and compare cloud configuration changes.
- Enabled efficient change tracking, helping users quickly identify discrepancies and resolve issues for improved control and faster resolution.

Creating a Visually Engaging Theme

- Contributed to the creation of a new theme, focusing on a visually appealing and user-friendly design to enhance the overall user experience.
- Collaborated in developing a visually striking theme, ensuring a modern and intuitive interface that aligns with branding and improves usability.

Global Reach with Multi-Language Support

- Developed and implemented language-switching functionality, allowing users to easily toggle between languages, ensuring a seamless and inclusive experience for diverse audiences

Standardized Code Quality with ESLint Integration

- Enabled ESLint in the codebase, ensuring consistent coding standards, improving code quality, and reducing errors through automated linting.

PERSONAL PROJECTS

TaskFlow

- Developed full-stack functionality with an intuitive UI and task management features—creation, editing, deletion, and tracking.
- **Stacks:- Angular, Angular Material, Spring Boot, Postgres**

Weather Wise

- Developed a Weather App with seamless API integration to fetch real-time weather data, providing an intuitive interface for accurate weather forecasts based on location or search criteria.
- **Stacks:- React JS, Material UI, Open Weather API**

AuthMicroservice

- Developed a secure login service with token-based authentication (JWT) to ensure safe user access, implementing back-end authentication logic for seamless login without server-side sessions.
- **Stacks:- Spring Boot, Spring Security**

Responsive Landing Page Development

- Developed a responsive landing page template for Unify, ensuring a seamless user experience across devices with an adaptive layout and modern design elements.
- **Stacks:- HTML, CSS, JS**
